

JLG Forklift Part

JLG Forklift Part - Following retirement in the late 1960's, John L. Grove embarked on a cross country RV voyage. After spending many years establishing his family built crane business with his brother, John had no idea that this journey would give birth to the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision material handling equipment was the end result of a road expedition.

All through their trip, John reacquainted himself with previous business acquaintances along the way. In combination with these conversations and a significant event; two workers had been unfortunately electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John discovered a vast marketplace for a product that could quickly and safely elevate people in the air to accomplish upkeep and other building services.

After returning from their holiday, John set up a partnership with two of his friends and obtained a metal fabricating company in McConnellsburg, Pennsylvania. Opening with a small crew of twenty employees, they fashioned and sold their first JLG aerial work platform in 1970. The business incorporates many of the simple design elements of that original lift into existing versions.

JLG lift trucks have come a long way from the time when Mr. John L. Grove returned to town from his cross-country road trip and since the first aerial work platform debuted on the market. At present, the business proudly continues to expand itself into many markets globally and develops new products to ensure customers are capable of being more efficient and perform in the workplace within a safer atmosphere.
